NPI Number Lookup for Doctors

NPI Number Look Up - NPI Lookup for Doctors & Physicians

What is the purpose of the NPI Number?
The NPI is the only health care provider identifier that can be used for identification purposes in standard transactions by covered entities. NPIs are also used to identify health care providers on prescriptions, in coordination of benefits between health plans, in patient medical record systems, in program integrity files, and in other ways. The Health Insurance Portability and Accountability Act (HIPAA) requires that covered entities use NPIs in standard transactions. The NPI must be used in lieu of legacy provider identifiers in the HIPAA standards transactions.
Thank you

- If you have any questions or concerns about this latest release of MAVEN please contact the helpdesk at isishelp@state.ma.us or 617-983-6801.

- We encourage and need user feedback to make the enhancements our users want and need to do their job effectively.

- New features you will find in this release are directly from user feedback so please let us know what you think and give us your suggestions.
