The next MAVEN core product upgrade will be released in the coming weeks. We wanted to use the ePostcard this month to share some of our favorite new features. More detailed release notes will be added to the Help Section. We will also have several webinars to review all of the changes prior to the release happening.

New Splash Screen
When you logon to MAVEN you will see a new splash screen that has a quick view and a link for full access to: 1) Workflows 2) Tasks 3) Recent Events (push pin icon) and 4) MAVEN Resources that will be updated as needed.

The full page of each section can be accessed by clicking the More….. Hyperlink.
MAVEN Concerns
Concerns will be used to highlight a question of particular importance we would like you to complete during your case investigation. Concerns will appear in red in the Event Summary for the following events:

- Enteric Disease events – Occupation (Demographic – Question Package 2)
- Babesiosis – Blood transfusion question (Risk History – Question Package 5)
- Vaccine Preventable Disease Events – vaccine information (Risk/Exposure/Control & Prevention Package - Question Package 5)

Once you answer the appropriate question the red concern will be removed. Note: you can still submit the case report form via MAVEN with these questions unanswered.
**Bookmark**

You can now bookmark cases in your most recent events from your pushpin icon. This can be helpful when you are tracking the same cases over a period of time.

- To select and bookmark, click on the green plus sign for an event. The star will become yellow and your event is now bookmarked.
- To remove from your bookmark – click on the yellow star

We will email everyone when we have a date for the new release (aka 6.4.1.6.5.1 or as we like to call it the Kennedy Release). In addition, we are planning on several webinars for review and questions. Please stay tuned.

*If you have questions about MAVEN, please email isishelp@state.ma.us or contact the MAVEN help desk at 617-983-6801.*
